RELATIVE WORK EXPERIENCE

INNOVATIONS FOR LEARNING -- Evanston, IL (Worked remotely from NYC)

Nonprofit focused on improving reading instruction in the primary grades.

Computer Programmer / Quality Assurance May 2015 to June 2019

Scope of work: Responsible for program design and implementation, across multiple frameworks. Managed all phases of application design, from coding and prototyping through automated QA testing, integration and deployment.

Highlights of Accomplishments:

- Solely developed multiple automated testing suites from the ground up. Designed and programmed 400+ scripted automated browser and app scripts in various frameworks. Managed / mentored a team of 3 QA interns.
- Engineered and developed Python applications to assist support team operations. Custom Python applications automated repetitive tasks and reported system diagnostics to a backend server accessible by the rest of the team.
- Worked with backend developers and designers to develop multiple educational based games in JavaScript.

IT Help Desk Manager November 2014 to June 2019 (*Seasonal, part time, September – June*)

Scope of work: Responsible for diagnosing and resolving technical issues pertaining to an online tutoring platform, TutorMate in a time sensitive environment. Lead a support team that managed and supports over 1000 support requests weekly, servicing over 800 machines internationally, across 36 school districts.

PREVIOUS EXPERIENCE

Multiple Years of non-remote IT / Amazon sales experience at AllTrade, inc || Hobbyist Tinkerer, Maker, Unity game developer, Computer/tech enthusiast || Retired professional wedding / high profile event photographer.
